

RIVERINA

CHICK STARTER CRUMBLES (Medicated)

PRODUCT DESCRIPTION

RIVERINA CHICK STARTER CRUMBLES is suitable to be fed as a complete feed to growing replacement layer pullets from day old through to approximately 6 weeks of age. Chicks should have unlimited access (feed ad-lib).

This feed is the first stage in a three stage-feeding programme for laying hens. It is produced in a fine crumble form so that feed wastage is minimised and digestibility is improved. Fine crumbles also ensure a consistent intake of nutrients essential for growth. (Note: there is no separation with crumbles).

COMPOSITION

- Base grain as depicted seasonally, and therefore proportions may vary.
- Wheat, maize, sorghum, bran and pollard, a combination of protein meals (cottonseed meal, soybean meal, sunflower meal, blood meal, meat meal), vegetable/animal oil, molasses, limestone, sodium-bicarbonate, salt, choline chloride, added lysine, added methionine, sodium salinomycin, Riverina vitamin & mineral premix.

DIRECTIONS FOR USE

- Environmental conditions including temperature and hygiene are of vital importance during the rearing layer pullet chick period.
- This feed is a complete feed and no supplementary feeding is necessary.
- During this period approximate feed intakes should be:

Age of Birds	Approximate Feed Consumption
Day old to one week	5 - 10 grams / bird / day
Two weeks	10 - 15 grams / bird / day
Four weeks	25 - 30 grams / bird / day
Six weeks	35 - 40 grams / bird / day

- NOTE: The above feed intakes are only indicative. Feed intakes will vary with the season, variety of bird, lighting, shed conditions, disease status and other environmental conditions.
- For the first two days of feeding, it is best to spread some feed on trays or newspaper to enable all birds access.
- It is important to change the feed regularly so it remains fresh and palatable.
- It is very important that birds have clean, cool, fresh water available at all times.

TECHNICAL RELEVANCE

- Contains digestible ingredients for young animals
- Protein meals provide natural sources of essential amino acids. Lysine and methionine are added to balance essential nutrient requirements.
- Contains essential vitamins and minerals.

VETERINARY CHEMICALS

This feed contains the following veterinary chemical:-

- Sodium salinomycin at the rate of 60 mg/kg.

MEDICINAL CLAIM

Sodium salinomycin is added to this feed for the prevention of caecal and intestinal coccidiosis caused by certain Eimeria species.

NUTRITIONAL ANALYSIS

SPECIAL FEATURES

COMPLETE FEED

- Supplies essential nutrients for growth. No need for any other supplementary feed to be used.

IN CRUMBLE FORM

- Eliminates separation that can occur with mash/meal type feeds. Improved digestibility. Consistent nutrient intake.

QUALITY PRODUCT

- Manufactured to strict quality control standards.

PRECISE FORMULATION AND MIXING

- Formulated in accordance with current research into poultry nutrition and mixed using a variety of quality raw materials.

MEDICATED

- Medicated to aid in the prevention of coccidiosis.

WITHHOLDING PERIOD Meat - Nil. Eggs - Do not feed to laying hens or within 7 days of laying.

WARNING

Do not feed to dogs, horses or other equines as it may prove fatal. Do not feed to birds being treated with tiamulin.

Contains RAM - do not feed to cattle, sheep and other ruminants.

STORAGE Cool, dry conditions, away from vermin.

EXPIRY AFTER MANUFACTURE

3 months from the date of manufacture.

PACK SIZE

20kg woven polypropylene bags.

Bulk load details available from your sales representative.

This feed is scientifically formulated for the intended species of animal and should not be fed to any other animal. It may contain medication and ingredients that may prove harmful if fed to other species.
